INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 96 (1990)

SUBJECT INDEX

alcohols
gas-phase acidities of carboxylic acids and — from collision-induced dissociation of dimer cluster ions, 181
alkyl *N*-allyloxycarbamates
the unusual gas-phase rearrangements of deprotonated — and related species, 347
atomic mass measurements
limits to Fourier transform-ion cyclotron resonance mass spectrometry for —, 275

bromoethanes
formation of Br_2^- in the reactions of thermal electrons with some bromomethanes and —, 341
bromomethanes
formation of Br_2^- in the reactions of thermal electrons with some — and bromoethanes, 341

C_2
electronic and vibrational transitions observed in collisions between — and He, 69
carboxylic acids
gas-phase acidities of — and alcohols from collision-induced dissociation of dimer cluster ions, 181
CBr_2Cl^+
experimental determination of the energies required to ionize the ions $CFCl^+$, $CFBr^+$, $CClBr^+$, CF_2Cl^+, CF_2Br^+, CCl_2F^+, CBr_2F^+ and —, 111
CBr_2F^+
experimental determination of the energies required to ionize the ions $CFCl^+$, $CFBr^+$, $CClBr^+$, CF_2Cl^+, CF_2Br^+, CCl_2F^+, — and CBr_2Cl^+, 111
$CClBr^+$
experimental determination of the energies required to ionize the ions $CFCl^+$, $CFBr^+$, —, CF_2Cl^+, CF_2Br^+, CCl_2F^+, CBr_2F^+ and CBr_2Cl^+, 111
CCl_2F^+
experimental determination of the energies required to ionize the ions $CFCl^+$, $CFBr^+$, $CClBr^+$, CF_2Cl^+, CF_2Br^+, —, CBr_2F^+ and CBr_2Cl^+, 111
$CFBr^+$
experimental determination of the energies required to ionize the ions $CFCl^+$, —, $CClBr^+$, CF_2Cl^+, CF_2Br^+, CCl_2F^+, CBr_2F^+ and CBr_2Cl^+, 111
CF_2Br^+
experimental determination of the energies required to ionize the ions $CFCl^+$, $CFBr^+$, $CClBr^+$, CF_2Cl^+, —, CCl_2F^+, CBr_2F^+ and CBr_2Cl^+, 111
CF_2Cl^+
experimental determination of the energies required to ionize the ions $CFCl^+$, $CFBr^+$, $CClBr^+$, —, CF_2Br^+, CCl_2F^+, CBr_2F^+ and CBr_2Cl^+, 111
$CFCl^+$
experimental determination of the energies required to ionize the ions —, $CFBr^+$, $CClBr^+$, CF_2Cl^+, CF_2Br^+, CCl_2F^+, CBr_2F^+ and CBr_2Cl^+, 111
cyanomethyl cation
on the rearrangement of the — derived from gaseous acetonitrile, 321

desorption process
TOF-SIMS with primary ions from the spontaneous —, 223
dimer cluster ions
gas-phase acidities of carboxylic acids and alcohols from collision-induced dissociation of —, 181
discharge lamp chemistry
quantitative time-of-flight mass spectrometry applied to study tungsten(VI) oxide halide decomposition reactions relevant to —, 233
double electron capture
— in a Landau–Zener model: a reaction window, 331

He
electronic and vibrational transitions observed in collisions between C_2 and —, 69
hyperthermal surface ionization
—: a novel ion source with analytical applications, 139

ion isolation
— and sequential stages of mass spectrometry in a quadrupole ion trap mass spectrometer, 117

Landau–Zener model
double electron capture in a —: a reaction window, 331

matrix effect
further study of the — on the extent of fragmentation in molecular ions M^+ produced under fast atom bombardment (FAB) conditions, 169
matrix viscosity
effect of — on FAB spectra, 243
metal cluster ion chemistry
secondary ion Fourier transform mass spectrometry: a new approach towards the study of —, 27
molecular ions M^+
further study of the matrix effect on the extent of fragmentation in — produced under fast atom bombardment (FAB) conditions, 169
multiply reflected ion trajectories
time-of-flight mass spectrometers with —, 267

plasma reactions
electron attachment chemistry of $SiCl_4$. Relevance to —, 299
protonated cyclic compounds
the effects of saturation and substitution on the mobility of —, 291

quadrupole collision cells
characteristics of linear and non-linear R.F.-only —, 97
quadrupole mass filter
a notch rejection —, 17

resonant laser ablation (RLA)
—, R1

$SiCl_4$
electron attachment chemistry of —. Relevance to plasma reactions, 299
spark source mass spectrometry
quantitative analysis in —, 199
sulfuric acid vapor
mass spectrum, ionization potential, and appearance potentials for fragment ions of —, 49

time domain signals
initial relative ion abundances and relaxation times from apodized, segmented FT/ICR —, 1
trace analysis
— using a commercial resonant ionisation mass spectrometer, 309
tungsten (VI) oxide halide decomposition reactions
quantitative time-of-flight mass spectrometry applied to study — relevant to discharge lamp chemistry, 233

unimolecular decomposition of a polyatomic ion
— in a variable-temperature selected-ion-flow-drift tube: experiment and theoretical interpretation, 77
